

During the searching function while inside the structure, a large single slash shall be made upon entry of each room or area. After the search of the room or area has been completed, a second large slash shall be drawn in the opposite direction forming an "X." The only information placed in any of the "X" quadrants while inside the structure shall be that pertaining to any significant hazards or the number of "LIVE" or "DEAD" victims.

Search Markings

Main Entrance Search Marking

VICTIM LOCATION MARKING SYSTEM

During the search function, it may be necessary to identify the location of a known or potential victim. The amount and type of debris in the area may completely cover or obstruct the location of the known or potential victim. The victim location marking symbols are made by the search team or other individuals conducting search and rescuer operations whenever a known or potential victim is located and not immediately removed. The victim location marking symbols should be made with orange spray paint with a line marking or "downward" application spray can.
